

Entry Keypad

Product Code
62269

GARAGE DOOR OPENERS

Description:

The entry keypad allows entry to the garage without using a transmitter. Simply enter your pre-programmed PIN (4 - 8 digit), press # and the door will open. Great for giving the kids a code instead of a transmitter or house keys, or program a simple code like 0000 for temporary access by tradespeople, reprogram your own code when they are finished.
